

Purple 10x10 matrix  
 Blue 20x20 matrix  
 Green 30x30 matrix  
 Yellow 40x40 matrix  
 Red 50x50 matrix

1 Point represents 100 simulations with the initial grid size and preset density.

Density ranges from 0.1 to 0.85 in steps of 0.05.

Looping is true when two periods are exactly the same.

Gridlock is true when no cars can move.

Unclear is true when when 1000 iterations is done and looping and gridlock do not occur.
